# BEFORE & AFTER

**Book a free consultation to discuss your aesthetic desires\***

**BEFORE**

**AFTER**

## DERMAL FILLERS – FACELIFT

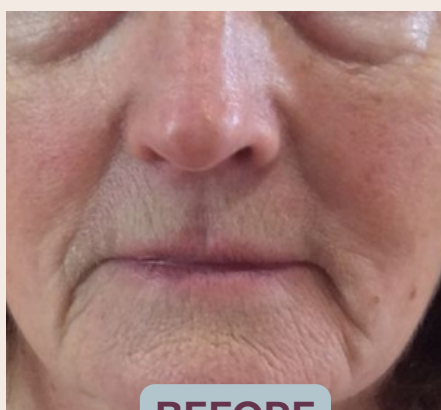

A non-surgical 1, 2, 3, 4, 5, 6, 7 or 8-point facelift refers to a treatment that uses dermal fillers in the face to give volume, lift, definition and shape and to smooth out the facial complexion.

The only difference is the number of places the fillers are used on your face.

## NON-SURGICAL FACELIFTS

Fillers are non-invasive and leave skin looking natural and radiant.

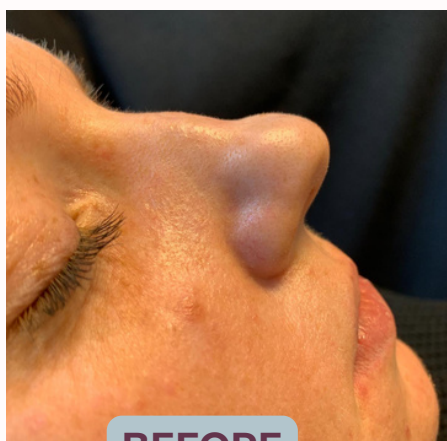

Treatments last up to 12-14 months with 4-dimensional outcomes for a continual youthful appearance.

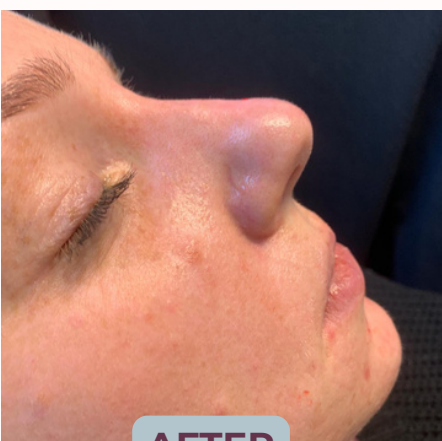

**BEFORE**

**AFTER**

**BEFORE**

**AFTER**

## RHINOPLASTY (NOSE JOB)

Using precise injecting techniques and long-lasting dermal fillers, the nose can gently be reshaped to address bumps, height, definition and undefined tips

\*Consultations for aesthetic treatments are free of charge. A small deposit of £75 (plus VAT) is taken prior to a consultation for all new clients and deducted from the treatment cost. This is to avoid 'no-show' losses. General medical advice and dermatology appointments are chargeable. Your £75 deposit is NON-REFUNDABLE in this situation (there is no VAT applied to this type of appointment).

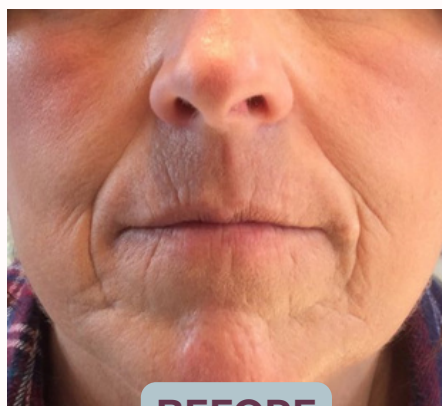

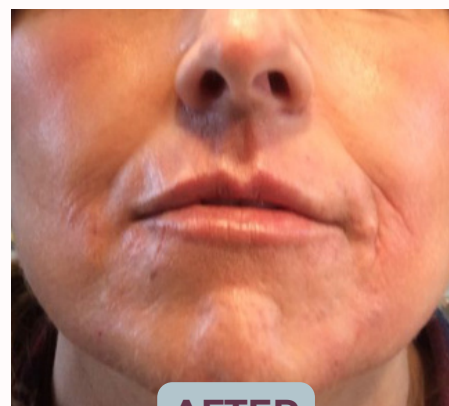

# DERMAL FILLERS – LIPS

Fillers enhance the lips' natural shape to achieve a fuller, plumper look by adding definition and volume.

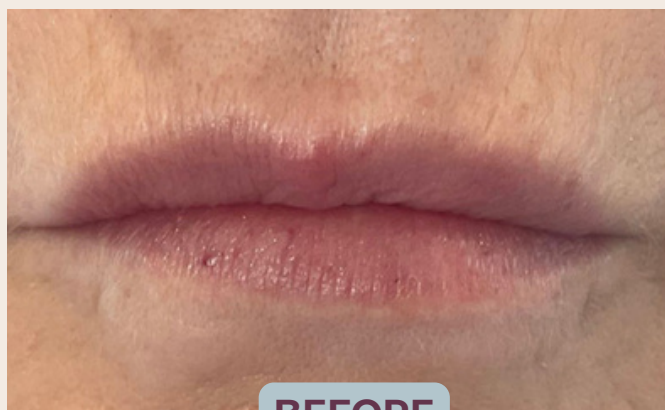

Treatment takes around 30 minutes and produces immediate results which last 6-12 months.

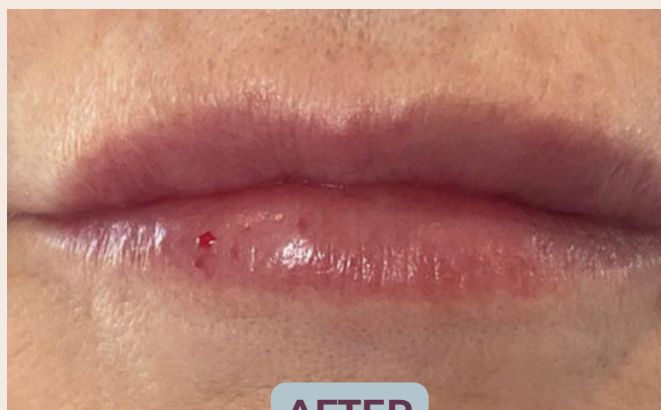

**BEFORE**

**AFTER**

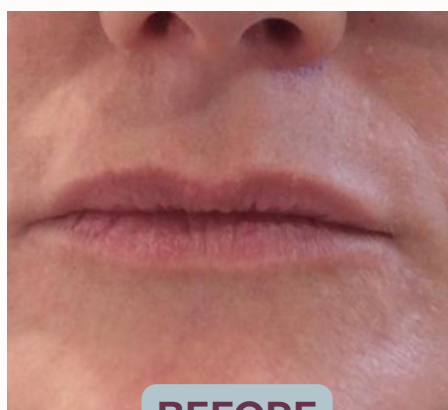

**BEFORE**

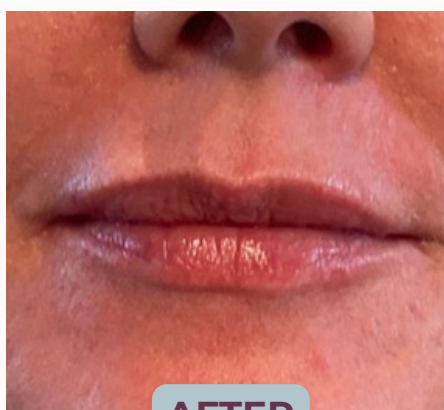

**AFTER**

Fillers can be used to even the shape of lips and tackle asymmetry between top and bottom or the left and right sides of the mouth.

**BEFORE**

**AFTER**

## LIPS CAN SAY SO MUCH EVEN WHEN NO WORDS ARE SPOKEN

Lips can say so much even when no words are spoken. The way lips look can affect the expression of the whole face.

Treatment to the border of your lips provides a crisp, well-defined shape and improves contour and definition.

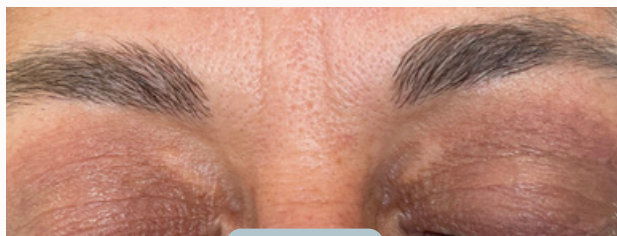

## PLEXR – EYE LIFT & EYE BAG REMOVAL

PLEXR is a machine that's excellent at removing the 'hoodedness' of an eyelid and the 'bagginess' of an eye bag – 'blepharoplasty', i.e. surgery that removes excess skin from the eyelids. PLEXR has been used in clinic for almost ten years.

Before a treatment or consultation, we may ask you to provide high-quality photographs of the front and side of your face and both eyes.

**BEFORE**

**AFTER**

## FAT DEPOSIT REMOVALS

All fatty deposits were removed after one 15-minute session of PLEXR for upper eyelid xanthelasma under local anaesthetic cream.

A minor reduction in pigmentation can be experienced that is easily camouflaged with makeup if needed.

Using Plexr to remove eye bags is a transformative solution that alters the appearance of the skin, revealing a fresh youthful look – with results on a par with surgery.

## PROFHILO – NECK

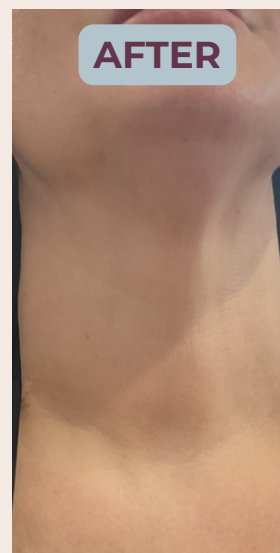

Profhilo is a revolutionary product that delivers visible change to the skin by applying the moisture-boosting benefits of hyaluronic acid beneath the skin's surface.

As the treatment is a smooth gel it is suitable for treating areas where the skin is delicate and is effectively used to remodel skin. Profhilo is ideal for treating the signs of age on the face, neck, décolletage, abdomen, arms and hands.

**BEFORE**

**AFTER**

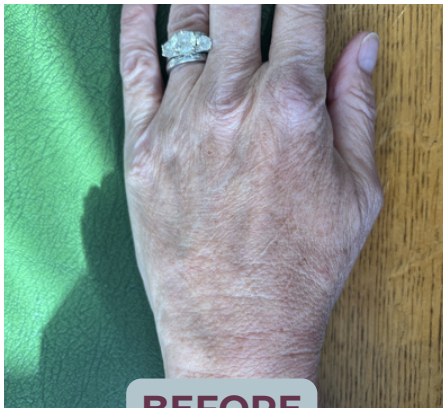

## CROMA PHILART

Croma PhilArt is clinically proven in safety and efficacy for the improvement of skin texture and elasticity to give a more youthful appearance.

91% of patients demonstrated clinical improvement in the reduction of superficial fine lines and wrinkles based on physician assessment.

**BEFORE**

**AFTER**

## PROFHILO

Profhilo is an injection that stimulates collagen production in your skin to improve its quality naturally.

Treatable areas include your neck, décolletage, entire face and hands.

## FAT DISSOLVING DESOBODY & DESOFACE

The active ingredient in fat-dissolving treatments is deoxycholic acid, the most potent currently available. It is applied as an injection to break down fat cells into smaller molecules, allowing them to be easily absorbed by the lymphatic system – and eventually removed.
